

NOW you don't have to pay a fortune for reliable high-speed performance

Cherry MX Keymodule: low cost...
low profile...full travel...tactile feel.
Meets tomorrow's European Safety Regulations today.

The perfect keymodule for thousands of demanding, high-speed word and data processing applications worldwide. And, it's ready now to meet 1985 Safety Regulations. **At the lowest cost of any full-feature keyboard switch.**

The proven contact concept—crossed knife edge gold contacts—provides high contact area force and eliminates closure interference by contaminants. Contact resistance is very low: typically 24 milliohms.

The innovative yet simple design of the MX results in an extremely low profile, easy operation, clean IC logic signals, long life (5×10^7 switchings)

and low power consumption. The new MX is one of the most reliable and lowest cost keymodules available.

You can get the MX with several options, including LED's, double contacts, angled stems, two poles for two functions—as single keymodules or as standard or custom keyboards designed to your specifications.

It is creative engineering such as this that makes Cherry the cost-effective headquarters for keymodules and keyboards. Your design task will be easier with a partner who uses the latest technologies to solve your specific interface problem. Contact Cherry today.
