

HIGH SPEED ENTRY?

The fastest fingers can't outrun Cherry's new solid state keyboard

Word processing...phototypesetting...key-to-disc...no application exceeds the capability of this Cherry keyboard. Scan time externally adjustable to as little as 1.1 milliseconds accumulated total (entire keyboard). Burst rate speed is 1000 characters per second.

Capacitive design delivers error-free operation...long life dependability.

No chance for false signals. A unique noise immunity circuit tests continuously for valid key depressions. Elec-

tronic hysteresis circuit eliminates "teasing." Reliable contactless design gives long, trouble-free service life.

Custom designs for your specific application, do-it-yourself options and user assignable keys on standard models add surprising versatility at affordable price.

Put solid state reliability to work in your data entry operation.

Call or write Cherry today for your free copy of our 36 page keyboard catalog and the "How To" book of detailed application data.
