

HI-TEK

KEYBOARDS AND DATA ENTRY PRODUCTS

NMB HI-TEK-PROGRESS AND GROWTH

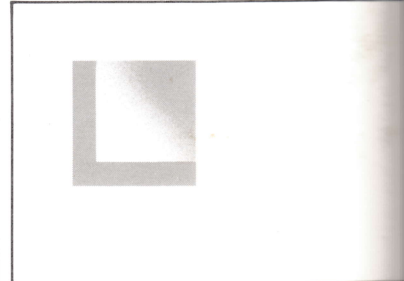

For the past decade, HI-TEK has achieved an excellent growth rate in the keyboard and data entry industry. Today the company holds a world-wide position of leadership in the design and manufacture of keyboards for a growing list of customers. In addition to its modern engineering and production facility in Garden Grove, California, NMB HI-TEK has two new automated manufacturing plants in Singapore and Thailand devoted to the volume production of keyboards and other data entry related products presently in development and in prototype configurations.

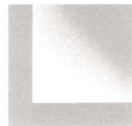

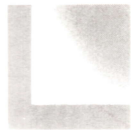

In mid 1983, HI-TEK was acquired by the Minebea Company of Japan and since that time has marketed its keyboard products with NMB Corporation, another Minebea subsidiary. The combination of these financial resources, with R & D, automated production facilities, engineering, marketing and available labor, has resulted in an accelerated growth plan for HI-TEK.

Today with high volume modern manufacturing facilities coupled with world-wide sales offices, NMB HI-TEK can satisfy OEM requirements throughout the world and offer special services to large multi-national companies unavailable from any other keyboard company.

In addition to its DIN standard line of both enclosed and unenclosed keyboard models, HI-TEK's engineers continue to develop new proprietary keyboard configurations to meet the demands of its expanding leadership role. Inherent within this rapid growth in both products and plants will be the traditional quality of product and performance excellence that has established HI-TEK at its present level of leadership in keyboards and data entry products...so contact NMB HI-TEK for quick and knowledgeable solutions to your keyboard and data entry applications and requirements.
