“RIGHT TOUCH”[™] KEYBOARDS

NEW

Hands-on performance with the “RIGHT TOUCH” family of Hi-Tek brand keyboards.

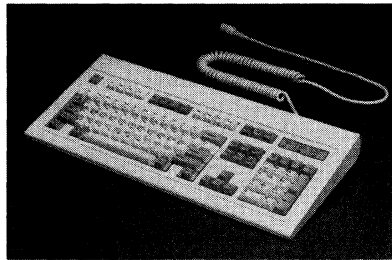

FEATURES

- Plug compatibility
- User friendly key layout
- 100 million cycle mechanical keyswitches
- Sublimation printed keycaps
- DIN standard, low profile
- Linear or tactile feel
- Membrane keyswitches for lower cost requirements
- Retractable legs and rubber foot pads

Standard or custom design, NMB Technologies offers keyboards having more features, more benefits and the highest quality. Automated factories offer high volume for OEM users worldwide at very competitive prices.

RT 101 KEYBOARDS

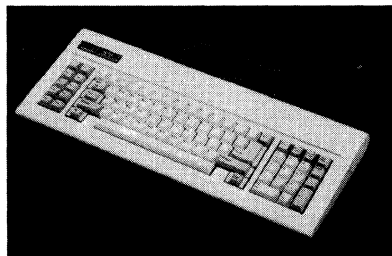

The RT keyboard line is a high performance affordable answer to requirements for PC, XT or AT systems. RT-101 is the popular new industry standard keyswitch layout.

FEATURES

- Tiered construction of outer margin keys
- Easy access slide switch changes modes
- Immediate delivery from stock
- 50 pc orders available from stock; call today to order!

AT-84 KEYBOARDS

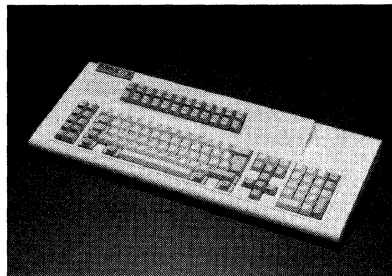

The AT-84 (PC) and the AT-84 (AT) models offer the smoothest keyswitch operation in the industry. The smooth feel and quiet operation of the keyswitch attests to the inherent quality and reliability.

FEATURES

- Separate numeric key pad
- Two versions, AT and PC
- Tiered construction of outer marginal keys
- LED's in NUM, SCROLL and CAPS LOCK keys or in the case

CUSTOM KEYBOARDS

The Hi-Tek keyboard line offers custom layout, full encoded models suited for the simplest or the most sophisticated systems. The 100 million cycle mechanical keyswitch can be employed in the DIN standard, low profile layout. Membrane keyswitches are also available for custom applications in low cost systems.

FEATURES

- High volume capability for large OEM's
- Domestic application engineering
- Convenient regional offices
