# RIGHT TOUCH™ KEYBOARDS

Hands-on performance with the "RIGHT TOUCH" family of Hi-Tek brand keyboards.

## FEATURES

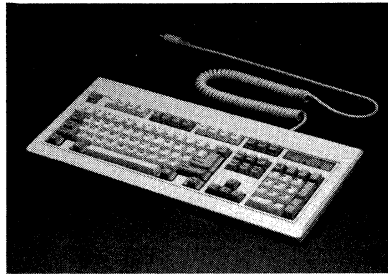

Standard or custom design, NMB Technologies offers keyboards having more features, more benefits and the highest quality. Automated factories offer high volume for OEM users worldwide at very competitive prices. The membrane or mechanical keyswitches can be employed in DIN standard low profile layouts.

- Plug compatibility
- User friendly key layout
- Sublimation printed keycaps
- Linear or tactile feel
- Retractable legs and rubber foot pads

## RT 101 KEYBOARDS

Now with membrane or mechanical switches

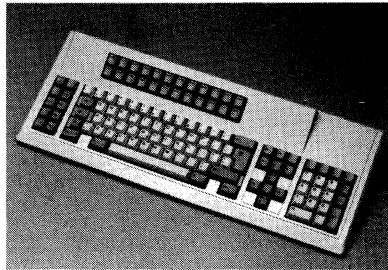

The RT keyboard line is a high performance affordable answer to requirements for PC, AT or PS2 systems. RT-101 is the popular new industry standard keyswitch layout.

### FEATURES

- Three popular keyswitch configurations
- Easy access slide switch changes modes
- Immediate delivery from stock
- 50 and 100 pc orders available from stock; call today to order! 1-800-321-3536.

## PC-122 KEYBOARDS

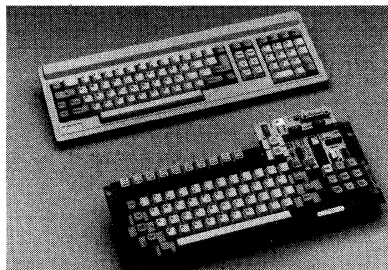

The PC-122 keyboard family features plug compatible, fully encoded models for the IBM 3270 PC, PC/AT or emulating systems. The smooth feel and quiet operation of the keyswitch attest to inherent quality and reliability.

### FEATURES

- Long life mechanical keyswitches
- New compact enclosure style
- Interface customization for all applications

## CUSTOM KEYBOARDS

Custom layouts, full encoded models are offered for the simplest or the most sophisticated systems. Membrane keyswitches are also available for custom applications in low cost systems.

### FEATURES

- High volume capability for large OEM's
- Domestic application engineering and stock
- Convenient regional offices
