

SMTP Werkzeug test attachment

This file is provided as a test attachment for performing e-mail testing.

This attachment is added to the HTML test messages generated by [SMTP Werkzeug](#), an e-mail delivery testing utility.

This paragraph only exists for the purposes of making it look like there is more text in this PDF than there really is. While I control both the vertical *and* the horizontal, I do not also control all the mail systems out there in the wild.

This is the end of the test attachment text.
