

# DATANETICS WHO?

Datanetics.

Keyboards. Our research says you may not know us...yet. You should.

We have the best line of keyboard products around. From standard 75 key keyboards stuffed with innovative features at low prices...to custom keyboards...to key switches...to our unique, ultra-thin touchboard.™

And we 100% test every Datanetics switch and board before it goes out our door, so you don't need to.

We have a bunch of major customers who swear by us...not at us.

That says a lot. But there's more. Send for our free product selection guide. (If you don't mind a little horn-tooting.)

Keyboards... **Datanetics**
