

Longer Life, Greater Reliability

The key to our unique Golden Touch capacitive keyboard is our patented, hinged moving plate design.

We create our capacitive effect with a hinged moving plate and one fixed plate, both attached to the printed circuit board. This gives our keyswitch much greater capacitance, at any given displacement, than the sponge-on-a-stick design used in other capacitive keyboards.

As a result, our keyswitch is virtually impervious to dust, debris, moisture and electrical noise. That's why we rate our Golden Touch at 250,000,000 MCBF—double anybody else's rating.

It also is why we guarantee a 1% AQL and give a 2-year warranty.

All our Golden Touch keyboards are designed precisely to your specifications—because we sell only to volume OEMs—so you can get whatever options, circuitry and configuration you want.

All this at competitive prices.
