

The Right Touch...

ONLY FROM HI-TEK'S NEW AT-84 KEYBOARD . . .
AND THEY'RE EITHER IBM® PC OR AT PLUG COMPATIBLE.

Our new AT-84 keyboard offers the smoothest keyswitch operation in the industry. The moment you press our 725 Series keyswitch,* the smooth feel and quiet operation is immediately apparent and your first reaction . . . Quality.

The new AT-84 incorporates many other exclusive features resulting in a keyboard that offers unsurpassed quality and reliability. It also meets DIN standards, and when you check our pricing, that's RIGHT too.

725 Series Key-switch Technology

— offers smooth feel, full travel, low profile design, quiet operation and life of 100,000,000 cycles.

User Friendly Layout — return and shift keys in familiar positions, also separate numeric keypad.

Full Width Marginal Keys — larger strike surface for easier and more accurate entry.

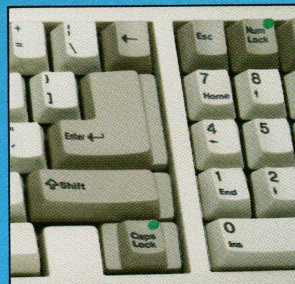

LED Indicators — located on Num, Scroll and Caps Lock keyswitches for quick identification of shift status.

IBM PC or AT Plug-Compatible Models

— two output versions which plug directly into either IBM PC or AT systems.

Other features include sublimation printed keycaps, 16 character buffer, multi-key or N-key rollover, linear or tactile feel, DIN or modular connector, and an optional mouse port.

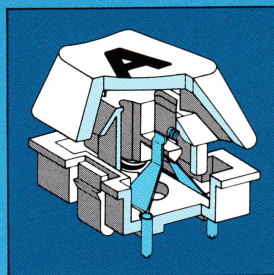

And another big plus is HI-TEK's expanded production capacity for the new AT-84 keyboard. Three modern automated factories in the U.S. and Asia enable

HI-TEK to produce large volume quantities for OEM's worldwide.

So when performance, quality and aggressive pricing are the criteria, the RIGHT CHOICE is HI-TEK's new AT-84 . . . Contact HI-TEK, a data entry leader, for our latest

brochure on the AT-84 and other keyboard products.
