

**If you've been looking for
all-solid-state keyboards to arrive,
why wait?**

**Call "the other keyboard company."
They're talking about a \$100-\$200 unit
and showing some enticing pictures.**

**They'll produce a good one, too.
Just you wait and see!**

***But if delivery's too long, call us.
You can have production quantities
of high-reliability, field-tested,
solid state keyboards at a
flat \$150, delivered. . . right now!***

In keyboards, everyone knows the way to go is solid state. And a lot of people are trying. But IKOR has it. Now. And you can get it. Now. Here's a keyboard with great application versatility available in a wide range of configurations. It interfaces with virtually any data handling device. Being solid state, its reliability is inherent. The keys are electronically interlocked to prevent errors caused by striking more than one key at a time. Each key generates its own code so it's easy to get exactly the keyboard arrangement you want without wiring changes. Diode matrices, mechanical switching or photo-electric devices are eliminated. The IKOR board provides serial or parallel inputs to any information system by generating any required code including ASCII, EBCDIC, BAUDOT, Teletype, etc. It is accurate, simple and trouble-free. For more information send in the coupon. It beats the reader service card by days and we know you're in a hurry . . .

**IKOR Incorporated, Second Avenue, Northwest Industrial Park, Burlington,
Massachusetts 01803 — Telephone (617) 272-4400**
