

Only Stackpole/MagsatTM keyswitches give tactile feel with n-key rollover for ultimate high thru-put speed.

Combine unique "human engineering" features with technical advances and you have the pace-setting Stackpole/Magsat mechanical keyswitch . . . new leader for data entry keyboards.

-  tactile/audible feedback and platform feel of an electric typewriter eliminate costly operator training.
-  positive trip (teaseproof) and true by-pass (n-key rollover) minimize operator errors.
-  one-shot, one millisecond pulse and dual strobed output with virtually bounce-free contacts simplify encoding.
-  open contact design requires no stand-by power, is insensitive to temperature, humidity, and stray magnetic and electrical fields.
-  Flexi-LegendTM buttons allow unlimited color and font flexibility.

Stackpole/Magsat keyswitches or complete keyboards give data entry terminals a unique marketing advantage and the assurance of low field service costs. Write for complete information. Stackpole Components Company, P.O. Box 14466, Raleigh, N.C. 27610. Phone 919-828-6201. TWX 510-928-0520.
