

# Our economy model.

Presenting inch-pinching, penny-pinching NW numeric keyboards with DTL encoding.

They can squeeze in back of most any panel. Because a low-profile design doesn't take up valuable, behind-panel space.

And they offer a slow make, slow break contact action at a low per-station cost.

Key formats are available in "adding machine," Touch-Tone\* or in custom colors and legends within existing housings. Which makes our new models ideal for desk top calculators, point of sale stations and credit verification equipment.

Or, for that matter, just about any application where compactness (total depth is less than one inch), life (tested to one million electrical operations) and low cost are important.

NW keyboards are available in either 12 (3x4) or 16 (4x4) stations. Each with BCD or Excess 3 codes. But if you don't require our encoding, non-encoded keyboards are also offered.

Your MICRO SWITCH Branch Office can arrange for off-the-shelf availability for evaluation and prototype use. Call them or write for our special NW keyboard literature.
